

Autograph

version 3

No other software gives teachers such control, and features, to illustrate and clarify mathematical concepts

CLASSROOM TOOLS - UNIQUE TO AUTOGRAPH

On-screen mathematical keyboard (can be used in all other computer applications)

Autograph is designed to work fully with an electronic Whiteboards and Tablets

Scribble tool: the perfect tool for prediction - reinforces conceptual understanding Belongs to Autograph, so it does not disappear like the Whiteboard writing tools.

Rub-out tool

Slow Plot Mode - gives the teacher full control over the plotting

VISUALISATION TOOLS - UNIQUE TO AUTOGRAPH

Animation Controller, allows you to control the motion of mathematical objects

Dynamic Constant Controller, for completely flexible control over your objects You control the step dynamically - so much better than fixed slider-bars

10 zoom options, giving full control over what is displayed

THREE PAGE TYPES - UNIQUE TO AUTOGRAPH

Statistics page: single-variable analysis, with wide variety of diagrams and tables

2D page: graphs (including IMPLICIT), shapes (transformations), vectors, matrices Differential Equations, Polar and Parametric equations; Calculus (including Area)

3D page: graphs (including IMPLICIT), shapes (transformations), vectors, matrices Lines, planes, surfaces, Polar and Parametric equations; Calculus (including Volume)

LINK WITH MS OFFICE - UNIQUE TO AUTOGRAPH

Easy pasting of data in and out of Excel

Easy pasting of screenshots and tables of values into Word

Finally: Autograph uses standard user interface conventions, so no special tricks to learn! Easy 'true-notation' equation input, no need to pre-define constants, and no "command-line".
